Ensuring a simple procedure remains simple

Hormone Replacement Therapy Tray

The Femcare disposable sterile H.R.T Tray for hormone replacement therapy is designed to help the busy nurse and doctor reduce the time consuming preparation normally required prior to performing hormone implants. The H.R.T Tray eliminates both expensive re-sterilisation costs and also the time lost in cleaning instruments. The likelihood of delays caused by the occasional forgotten item is also eliminated, thus ensuring that a "simple procedure remains simple..."

The tray includes the necessary equipment for hormone implantation, which should be decided upon according to clinical indications.

The Hormone Replace Therapy Tray consists of two packs:

The contents of Pack One are supplied sterile as listed below and are contained within a tray:-

Pack Two is an accessory to Pack One and contains individually packaged sterile items as listed below:-

Pack One

1 x Sterile plastic tray with reservoirs for antiseptic and hormone pellets
